

## Site Design Standards

### Planted Buffer Examples

#### SMALL BUFFER TYPOLOGY EXAMPLES (from left)

- residential buffer formed by small ornamental fence and plantings
- non-residential buffer formed by larger fence and plantings
- living fence buffer formed with fence and self-clinging vines
- hedge buffer formed by clipped shrubs

#### LARGE BUFFER TYPOLOGY EXAMPLES

(from left)

- buffer utilizing evergreen trees and shrubs of uniform size
- buffer with evergreen trees and shrubs of various sizes

#### Legislative Intent

- 20.131 Where required, planted buffers are intended to clearly delineate edges between public and private outdoor spaces, and to create visual barriers where two incongruous land uses adjoin and/or where objectionable views might otherwise exist.

#### Design Standards

- 20.132 Planted buffers shall respond to specific screening requirements for each site.
