Street Lights

Downtown Street Light

Downtown Street Light

Legislative Intent

- 20.57 To promote greater visual continuity among the Borough's diverse public spaces, selection of open space amenities such as high-quality site furnishings, sign poles, street lights, and paving materials is intended to be from a list of approved Streetscape components.
- 20.58 Compliance with Borough-approved public amenities (or Borough-approved equals) is intended to celebrate local heritage, to withstand the test of time, and to create durable, safe, and attractive public spaces which reinforce a distinctive sense of place.

Design Standards

- 20.59 Pedestrian-scaled Washington Boulevard Street Lights with standard green poles as supplied by PPL (or approved equal) shall be installed and maintained along both sides of a street. To address 'dark sky' initiatives by reducing light pollution and light trespass, model # 'K118 Washington' luminaires with 'VL1 Cut Off Optical System' manufactured by King Luminaire Ornamental Lighting shall be used.
- 20.60 Street Lights and street trees shall be located to achieve proper spacing for street and sidewalk illumination levels desired by the Borough Engineer, and to minimize impacts with open doors of vehicles parked in on-street parking spaces.
